

# Deva Anand

(413) 315-1715 | devaanand@umass.edu | devaanand.com | linkedin.com/in/devaaa | github.com/Deva-1903

## Education

### University of Massachusetts Amherst

Master of Science in Computer Science

September 2025 – May 2027 (Expected)

Amherst, MA

**Coursework:** Systems for Data Science, Performance Engineering, Optimization in CS, Advanced Machine Learning, Advanced NLP

### Vels Institute of Science, Technology and Advanced Studies

Bachelor of Engineering in Computer Science and Engineering

August 2019 – May 2023

Chennai, India

## Skills

### Languages

TypeScript, JavaScript, Python, SQL, Java, C++, Bash, HTML/CSS

### Full-Stack & Web

React, Tailwind, Node.js, Express, FastAPI, REST APIs, async services, MongoDB, PostgreSQL, Redis

### AI & GenAI

LLMs, embeddings, RAG, LLM agents, prompt design, OpenAI / Groq APIs, sentence-transformers, PyTorch

### AI-Assisted Dev

Claude / Claude Code, GitHub Copilot, Cursor, ChatGPT / Codex, agent-driven workflows

### Cloud & DevOps

AWS (S3, KMS), GCP, Azure, Docker, Git, GitHub Actions, CI/CD, Linux

## Experience

### Wysa

Backend Engineer

July 2023 – July 2025

Bengaluru, India

- Engineered **multi-tenant NHS eTriage platform** for **8+ UK clients** (Node.js, MongoDB) processing **10,000+ monthly submissions** as a production-grade system integrated with Mayden's iaptus platform via REST APIs and aggregation pipelines, contributing to **\$340K+** in revenue.
- Architected full-stack data annotation platform (**React, Node.js, MongoDB**) used daily by AI team to label data for production models, replacing spreadsheet workflows with secure role-based REST APIs; cut manual operations by **100+ hours/month** and improved labeling throughput by **60%**.
- Owned backend reliability across the eTriage stack: monitored production logs during feature releases and client integrations, shipped fixes for tenant-specific incidents, hardened authentication and rate limiting, and remediated **20+ Vulnerability Assessment and Penetration Testing (VAPT) findings** to protect sensitive clinical data.

### Cario Growth Services Pvt. Ltd.

Backend Developer Intern

November 2022 – May 2023

Chennai, India

- Designed and implemented **20+ RESTful APIs** in Node.js and Fastify, backed by **PostgreSQL**, with input validation, clear contracts, and backward-compatible changes used in production by the frontend team.
- Migrated core codebase from **JavaScript to TypeScript** across multiple repositories and prototyped LLM-powered context-aware replies in a chat product, improving type safety, maintainability, and end-user response quality.

## Projects

### AgenticSearch - Provenance-First Entity Discovery

github.com/Deva-1903/ciir\_agentic\_search

Python, FastAPI, Brave Search, OpenAI / Groq, SQLite

- Developed multi-stage agentic web-discovery service that plans typed retrieval, reranks pages, classifies evidence regimes, extracts entities with deterministic parsers before LLM fallback, verifies outputs, and returns cell-level provenance for every result.
- Hardened service with **150+ automated tests**, provider routing and fallback across LLM backends, pipeline instrumentation, and reviewer-facing trust user interface (UI) for inspecting extraction quality and ranking transparency.

### Underdogs Fitness - Production Full-Stack Web Platform

underdogsfitness.in

React, Node.js, Express, MongoDB, Stripe | live in production 3+ years

- Built and shipped a production web platform **solo end-to-end** (React + Node.js + MongoDB), with auth, memberships, attendance, and **Stripe** payments with a partial-payment ledger, live and reliable for real users **3+ years**.
- Set up git-webhook auto-deploy and cron-driven automation that moved **90%+** of payments through the portal and cut the client's manual workload by **~70%**.

### cf-ai-research-scout - Edge-Native AI Research Assistant

github.com/Deva-1903/cf\_ai\_research\_scout

TypeScript, Cloudflare Workers AI, WebSockets, SQL

- Built edge-native AI research assistant: agent fetches web sources, generates multi-step research digests, and streams responses back to the client over **WebSocket** in real time, prototyped end-to-end on Cloudflare Workers with embedded SQL storage.
- Designed durable workflow boundaries so multi-step research tasks survive process restarts and individual tool failures; agent state and conversation history persist server-side without an external database.

## Publication & Extracurriculars

- Publication:** "Alzheimer's Disease Classification using Transfer Learning," **IEEE CONIT 2023**, applied deep transfer learning on neuroimaging data for medical image classification.
- Selected for **GirlScript Summer of Code (GSSoC) 2023** and contributed to multiple open-source projects (Linkfree, Freehit, ProjectsHut).
- Tutored **30+** underprivileged students in programming at Sayur, non-profit in South Tamil Nadu.
