Education

MS, Computer Science, University of Massachusetts Amherst 2025–2027
Advanced NLP, Advanced Machine Learning, Optimization in CS, Systems for Data Science, Performance Engineering

BE, Computer Science and Engineering, Vels Institute of Science, Technology and Advanced Studies 2019–2023

Professional Experience

Wysa, Backend Engineer | *Bengaluru, India* Jul 2023 – Jul 2025

- Engineered a multi-tenant NHS eTriage web application (Node.js, MongoDB) for **8+ UK clients**, processing **10,000+ monthly submissions** via REST/JSON integrations; contributed to **\$340K+** in revenue.
- Built a full-stack content platform (React front end, Node.js/MongoDB back end) used daily by the team, cutting manual work by **100+ hours/month** and lifting throughput by **60%**.
- Supported production issues by monitoring logs and debugging incidents to root cause in an Agile/Scrum team, added integration tests, hardened auth, and remediated **20+ VAPT findings**.
- Served as primary technical POC, onboarded a second developer to on-call readiness, and piloted a COO-sponsored GitHub Copilot experiment.

Cario Growth Services, Backend Developer Intern | *Chennai, India* Nov 2022 – May 2023

- Designed, integrated, and tested **20+ RESTful API endpoints** (Node.js, Fastify, **PostgreSQL/SQL**) returning **JSON**, with input validation and clear, backward-compatible contracts used in production by the frontend team.
- Migrated core repositories from JavaScript to TypeScript and shipped a production feature running a **4-bit quantized Llama-7B** model via llama.cpp with async queued generation.

Freelance / Open Source, Full-Stack Engineer | *Remote* Jul 2022 – Aug 2023

- Built and deployed **Underdogs Fitness** (Website), a production full-stack MERN web application with an HTML/CSS front end, REST APIs, and a multi-branch data model, independently end to end; live **3+ years**.

Projects

AgenticSearch – Provenance-First Entity Discovery (GitHub | Demo) Python, FastAPI, OpenAI / Groq, SQLite

- Built a Python/FastAPI back-end service exposing **REST API endpoints** that return **JSON**, with typed retrieval planning, deterministic extraction, output verification, and provider routing; hardened with **150+ tests** and containerized with **Docker** for cloud deployment.

Sonare – Offline Sign / Speech App (GitHub) React, Electron, FastAPI, MediaPipe, whisper.cpp

- Engineered a **React** front end and FastAPI back end integrating camera, microphone, and local services (MediaPipe hand tracking, whisper.cpp ASR, local TTS) into one application, with a responsive component-based UI and async APIs keeping it fluid under live streams.

cf-ai-research-scout – Edge-Native AI Assistant (GitHub) TypeScript, Cloudflare Workers, Durable Objects, D1

- Built a full-stack **TypeScript** service with durable, multi-step workflows that survive process restarts and tool failures, and edge deployment on Cloudflare Workers, streaming results to the client over WebSocket in real time.

Publications

- “Alzheimer’s Disease Classification using Transfer Learning,” IEEE CONIT 2023, first author, deep transfer learning on neuroimaging data. (Paper)

Skills

Languages: JavaScript, TypeScript, Python, SQL, HTML/CSS, C++, Java, Bash

Web & Full-Stack: React, Next.js, Node.js, Express, REST APIs, JSON, FastAPI

Databases: PostgreSQL, MongoDB, SQL, SQLite

DevOps & Agile: Docker, Kubernetes, Git, GitHub Actions, CI/CD, Agile / Scrum

Cloud & Platforms: Azure, AWS, GCP, Linux, MongoDB Atlas

Achievements

- Selected for **GirlScript Summer of Code 2023**; contributed to Linkfree, Freehit, and ProjectsHut. - Tutored **30+ underprivileged students** in programming at Sayur, a non-profit in Tamil Nadu.
