

Deva Anand

(413) 315-1715 | devaanand@umass.edu | devaanand.com | linkedin.com/in/devaaa | github.com/Deva-1903

Education

University of Massachusetts Amherst

Master of Science in Computer Science

September 2025 – May 2027 (Expected)

Amherst, MA

Coursework: Systems for Data Science, Performance Engineering, Optimization in CS, Advanced Machine Learning, Advanced NLP

Vels Institute of Science, Technology and Advanced Studies

Bachelor of Engineering in Computer Science and Engineering

August 2019 – May 2023

Chennai, India

Skills

Languages

Python, JavaScript, TypeScript, SQL, Java, C++, Bash, HTML/CSS, Tailwind

AI & LLM Workflows

LLM agents, prompt design, model/LLM evaluation, OpenAI / Groq APIs, RAG, Claude / Claude Code, GitHub Copilot, Cursor, ChatGPT / Codex

Backend & Web

Node.js, Express, FastAPI, REST APIs, React, full-stack web apps, async services, workflow automation, integration testing

Cloud & DevOps

AWS (S3, KMS), GCP, Azure, Docker, Git, GitHub Actions, CI/CD, git-webhook auto-deploy, Linux

Databases & Data

MongoDB, PostgreSQL, Redis, SQLite, Apache Spark / PySpark

Experience

Wysa

Backend Engineer

July 2023 – July 2025

Bengaluru, India

- Engineered **multi-tenant NHS eTriage platform** for **8+ UK clients** (Node.js, MongoDB) processing **10,000+ monthly submissions** as a production-grade system integrated with Mayden's iaptus platform via REST APIs and aggregation pipelines, contributing to **\$340K+** in revenue.
- Built a full-stack **internal tool** (React, Node.js, MongoDB) used daily by the AI team, replacing manual spreadsheet workflows with secure role-based APIs; **automated manual work**, cutting it by **100+ hours/month** and improving team throughput by **60%**.
- Joined a **GitHub Copilot** productivity pilot, routing tech-debt PRs, migrations, and reviews through AI-assisted workflows and maintaining a conventions file to keep agent-generated code aligned with team patterns, while owning backend reliability and debugging production incidents.

Cario Growth Services Pvt. Ltd.

Backend Developer Intern

November 2022 – May 2023

Chennai, India

- Designed and implemented **20+ RESTful APIs** in Node.js and Fastify, backed by **PostgreSQL**, with input validation, clear contracts, and backward-compatible changes used in production by the frontend team.
- Migrated core codebase from **JavaScript to TypeScript** across multiple repositories and prototyped LLM-powered context-aware replies in a chat product, improving type safety, maintainability, and end-user response quality.

Projects

AgenticSearch - Provenance-First Entity Discovery

github.com/Deva-1903/ciir_agentic_search

Python, FastAPI, Brave Search, OpenAI / Groq, SQLite

- Developed multi-stage agentic web-discovery service that plans typed retrieval, reranks pages, classifies evidence regimes, extracts entities with deterministic parsers before LLM fallback, verifies outputs, and returns cell-level provenance for every result.
- Hardened service with **150+ automated tests**, provider routing and fallback across LLM backends, pipeline instrumentation, and reviewer-facing trust user interface (UI) for inspecting extraction quality and ranking transparency.

AutoEval - AI Model & Prompt Evaluation Agent

github.com/Deva-1903/AutoEval

Python, LLM Evaluation, Git Automation

- Built an agent that proposes test cases and labels, scores them against multiple systems, and accepts only updates that improve **discriminative power**, giving a measurable, reproducible way to **evaluate and compare AI models and prompts**.
- Added anti-Goodharting guardrails (schema checks, duplicate rejection, holdout protection) and committed accepted updates back to Git with report cards for an auditable evaluation workflow.

Underdogs Fitness - Production Full-Stack Web Platform

underdogsfitness.in

React, Node.js, Express, MongoDB, Stripe | live in production 3+ years

- Built and shipped a production web platform **solo end-to-end** (auth, memberships, attendance, **Stripe** payments with a partial-payment ledger), live in production for **3+ years**.
- Set up **git-webhook auto-deploy** and **cron-driven workflow automation** that moved **90%+** of payments through the portal and cut the client's manual workload by **~70%**.

Publication & Extracurriculars

- Publication:** "Alzheimer's Disease Classification using Transfer Learning," **IEEE CONIT 2023**, applied deep transfer learning on neuroimaging data for medical image classification.
- Selected for **GirlScript Summer of Code (GSSoC) 2023** and contributed to multiple open-source projects (Linkfree, Freehit, ProjectsHut).
- Tutored **30+** underprivileged students in programming at Sayur, non-profit in South Tamil Nadu.
