Education

MS, Computer Science, University of Massachusetts Amherst 2025–2027
Advanced NLP, Advanced Machine Learning, Optimization in CS, Systems for Data Science, Performance Engineering

BE, Computer Science and Engineering, Vels Institute of Science, Technology and Advanced Studies 2019–2023

Professional Experience

Wysa, Backend Engineer | *Bengaluru, India* Jul 2023 – Jul 2025

- Engineered a multi-tenant NHS clinical eTriage backend (Node.js, MongoDB) for **8+ UK clinical clients**, processing **10,000+ monthly submissions** over sensitive patient data via Mayden iaptus REST integrations; contributed to **\$340K+** in revenue.
- Architected a full-stack React/Node.js platform used daily by the AI team to structure and label clinical training data, cutting manual work by **100+ hours/month** and lifting throughput by **60%**.
- Wrote clean, well-tested code: added integration tests, participated in code reviews, hardened auth and rate limiting with **AWS KMS** encryption for PII/clinical data, and remediated **20+ VAPT findings**.
- Served as primary technical POC, wrote knowledge-transfer documentation, and piloted a COO-sponsored GitHub Copilot experiment using LLM tools for AI-assisted development.

Cario Growth Services, Backend Developer Intern | *Chennai, India* Nov 2022 – May 2023

- Integrated LLM-powered context-aware replies into a chat product with prompt iteration and content-safety filtering, and shipped a production feature on a **4-bit quantized Llama-7B via llama.cpp**.
- Designed and shipped **20+ RESTful APIs** (Node.js, Fastify, PostgreSQL) with validation and clear contracts, and migrated core repositories from JavaScript to TypeScript.

Freelance / Open Source, Full-Stack Engineer | *Remote* Jul 2022 – Aug 2023

- Built and shipped **Underdogs Fitness** (Website) solo end-to-end, a live consumer web product (MERN) with Stripe payments, cron automation, and multi-branch support; live **3+ years**.

Projects

AgenticSearch – Provenance-First Entity Discovery (GitHub | Demo) Python, FastAPI, OpenAI / Groq, SQLite

- Built a Python/FastAPI AI-backed service that turns messy open-ended inputs into structured, verifiable data tables via LLM extraction with deterministic fallback and **cell-level provenance**; hardened with **150+ tests**.

cf-ai-research-scout – Edge-Native AI Assistant (GitHub) TypeScript, Cloudflare Workers AI, Durable Objects, D1

- Built an edge-native full-stack AI assistant in TypeScript where an agent streams multi-step results to the client over WebSocket in real time, with durable workflows and D1-backed state.

Sonare – Offline Sign / Speech App (GitHub) React, Electron, FastAPI, MediaPipe, whisper.cpp

- Built a cross-platform desktop app with a React front end and FastAPI backend, integrating an on-device pipeline with async APIs and queues to keep the UI responsive.

Publications

- “Alzheimer’s Disease Classification using Transfer Learning,” IEEE CONIT 2023, first author, deep transfer learning on neuroimaging data. (Paper)

Skills

Languages & Databases: Python, JavaScript, TypeScript, SQL, C++, Java, Bash, PostgreSQL, MongoDB, SQLite

Frameworks / Tools: FastAPI, React, Next.js, Node.js, Express, REST APIs, Git, Docker

LLM & AI: LLM APIs (GPT / Claude / Groq), prompt engineering, LLM app development, RAG, structured extraction, PyTorch

Testing / Practices: pytest, integration testing, code reviews, CI/CD, Git webhooks, debugging

Cloud / Platforms: AWS, GCP, Azure, Vercel, MongoDB Atlas

Achievements

- Selected for **GirlScript Summer of Code 2023**; contributed to Linkfree, Freehit, and ProjectsHut. - Tutored **30+ underprivileged students** in programming at Sayur, a non-profit in Tamil Nadu.
