Four Hands  
Austin, TX

## Re: IT Support Intern

Dear Four Hands Hiring Team,

I am a Computer Science master's student at UMass Amherst applying for the IT Support Intern role. Across two years as a backend engineer and several client projects, the work I have consistently enjoyed most is exactly what this role is built around: diagnosing problems, communicating clear resolutions, and leaving behind documentation that makes the next person's job easier.

At Wysa, I supported a multi-tenant clinical platform serving 8+ UK client organizations, where I monitored production logs during releases and client integrations, diagnosed tenant-specific issues, and shipped targeted fixes to keep the service stable. I was the primary technical point of contact for that system, which meant communicating resolutions to non-engineering stakeholders and onboarding a new engineer through structured knowledge transfer. That mix of troubleshooting, follow-through, and plain-language communication is what I would bring to your ticket queue.

I also enjoy the hands-on, organized side of IT. As a freelance engineer I built and maintained an inventory management system for a US client and a gym-management platform (live in production 3+ years) that tracks members, attendance, and payment records, so keeping accurate records and dependable systems is familiar territory. In my current role I own an internal platform end to end, including its design documentation and test suite, and I work comfortably across Linux, macOS, and Windows with tools like Docker, Git, and Azure.

What draws me to Four Hands is the team-first, do-it-well culture. I try to be open and honest about what I know and what I still need to learn, take responsibility for the small details, and I genuinely enjoy helping people get unblocked, whether that is a colleague or one of the 30+ students I have tutored in programming. I am eager to pick up your imaging, ticketing, and asset-management tools and to contribute reliably throughout the Fall term.

Thank you for considering my application. I would welcome the chance to discuss how I can support the Four Hands IT team.

Sincerely,  
Deva Anand
