Education

MS, Computer Science , University of Massachusetts Amherst	2025–2027
<i>Advanced NLP, Advanced Machine Learning, Optimization in CS, Systems for Data Science, Performance Engineering</i>	
BE, Computer Science and Engineering , Vels Institute of Science, Technology and Advanced Studies	2019–2023

Professional Experience

Wysa, Backend Engineer | *Bengaluru, India* Jul 2023 – Jul 2025

- Engineered a multi-tenant NHS eTriage backend (Node.js, MongoDB) exposing REST APIs and Mayden iaptus integrations for **8+ UK clinical clients**, processing **10,000+ monthly triage submissions**; contributed to **\$340K+** in revenue.
- Architected a full-stack internal platform (React, Node.js, MongoDB) relied on daily by the AI team, cutting manual work by **100+ hours/month** and lifting throughput by **60%**.
- Owned authentication and reliability: added integration tests, hardened auth and rate limiting, monitored production logs for observability, and remediated **20+ VAPT findings**.
- Collaborated in an Agile team (code reviews, stand-ups, planning) as primary technical POC, wrote knowledge-transfer documentation onboarding a second developer in **~6 weeks**, and piloted a COO-sponsored GitHub Copilot experiment for AI-assisted development.

Cario Growth Services, Backend Developer Intern | *Chennai, India* Nov 2022 – May 2023

- Designed and shipped **20+ RESTful HTTP APIs** (Node.js, Fastify, PostgreSQL) with validation, clear contracts, and backward-compatible changes used in production by the frontend team.
- Picked up new stacks quickly: migrated core repositories from JavaScript to TypeScript and shipped a production LLM feature (**4-bit quantized Llama-7B via llama.cpp**) with async queued generation and content-safety filtering.

Freelance / Open Source, Full-Stack Engineer | *Remote* Jul 2022 – Aug 2023

- Built and deployed **Underdogs Fitness** (Website), a production MERN platform with **git-webhook CI/CD** (GitHub webhook to a droplet on push), cron automation, and Stripe payments; live **3+ years**.

Projects

AgenticSearch – Provenance-First Entity Discovery (GitHub | Demo) Python, FastAPI, OpenAI / Groq, SQLite

- Built a Python/FastAPI backend service with client-facing HTTP APIs, provider routing/configuration, and pipeline instrumentation for observability; hardened with **150+ automated tests**.

cf-ai-research-scout – Edge-Native AI Assistant (GitHub) TypeScript, Cloudflare Workers AI, Durable Objects, D1

- Built backend service infrastructure in TypeScript (Cloudflare Workers) with durable multi-step workflows, D1 storage, and WebSocket streaming, so tasks survive process restarts and individual tool failures.

AutoEval – Retrieval Evaluation Improvement Agent (GitHub) Python, IR evaluation, Git automation

- Built a Git-integrated developer tool that proposes and validates changes, scores them against multiple systems, and commits only improvements with report cards and anti-Goodharting guardrails.

Publications

- “Alzheimer’s Disease Classification using Transfer Learning,” IEEE CONIT 2023, first author, deep transfer learning on neuroimaging data. (Paper)

Skills

Languages & Databases: Python, Go, TypeScript, JavaScript, C++, Java, SQL, Bash, PostgreSQL, MongoDB

Frameworks / Tools: Node.js, Express, FastAPI, React, Next.js, HTTP servers, REST APIs, Docker

Backend / Platform: authentication, rate limiting, observability (logging / monitoring), CI/CD, code reviews, Git, GitHub Actions

ML & AI: PyTorch, Hugging Face Transformers, LLM integration, RAG, evaluation

Cloud / Platforms: AWS, GCP, Azure, Docker, MongoDB Atlas

Achievements

- Selected for **GirlScript Summer of Code 2023**; contributed to Linkfree, Freehit, and ProjectsHut. - Tutored **30+ underprivileged students** in programming at Sayur, a non-profit in Tamil Nadu.
