

# Deva Anand

(413) 315-1715 | devaanand@umass.edu | devaanand.com | linkedin.com/in/devaaa | github.com/Deva-1903

## Education

### University of Massachusetts Amherst

Master of Science in Computer Science

September 2025 – May 2027 (Expected)

Amherst, MA

**Coursework:** Systems for Data Science, Performance Engineering, Optimization in CS, Advanced Machine Learning, Advanced NLP

### Vels Institute of Science, Technology and Advanced Studies

Bachelor of Engineering in Computer Science and Engineering

August 2019 – May 2023

Chennai, India

## Skills

### Languages

TypeScript, JavaScript, Python, Java, C++, SQL, HTML/CSS

### Frontend & Web

React, Redux, client-side state, component-based UI, responsive design, Electron, REST integration

### Backend & APIs

Node.js, Express, FastAPI, REST APIs, async services, integration testing

### Cloud & DevOps

AWS, GCP, Azure, Docker, Git, GitHub Actions, CI/CD, Linux

### AI & Agents

LLM agents, RAG, OpenAI / Groq APIs, agentic pipelines, PyTorch

## Experience

### Wysa

Backend Engineer

July 2023 – July 2025

Bengaluru, India

- Built a full-stack **internal-tool UI (React)**, Node.js, MongoDB) used daily by the AI team to label and review training data, replacing spreadsheets with a role-based interface over an AI data workflow; cut manual work by **100+ hours/month** and improved throughput by **60%**.
- Engineered the multi-tenant NHS eTriage backend (Node.js, MongoDB) for **8+ UK clients** processing **10,000+ monthly submissions**, shipping features from concept to deployment and owning reliability and **20+ VAPT** fixes.

### Cario Growth Services Pvt. Ltd.

Backend Developer Intern

November 2022 – May 2023

Chennai, India

- Migrated the core codebase from **JavaScript to TypeScript** across multiple repositories and designed **20+ REST APIs** (Node.js, Fastify, PostgreSQL), improving type safety, maintainability, and the contracts the frontend consumed.
- Integrated **LLM-powered** context-aware replies into a chat product, an interactive AI application, iterating on prompt design and response-quality heuristics for a real customer-facing experience.

## Projects

### Underdogs Fitness - Production React + Redux Platform

underdogsfitness.in

React, Redux, Node.js, Express, MongoDB Atlas, Stripe | solo, live in production 3+ years

- Built and deployed a **production React + Redux** platform solo end-to-end, with **client-side state management**, admin dashboards for membership, attendance, and payments, and Stripe payment flows; live in production **3+ years**.
- Designed reusable, **component-based UI** scoped by a frontend branch-context provider; when the client opened a 2nd branch, onboarded it as a configuration change with **zero schema migration**.

### AgenticSearch - UI for an AI Extraction Tool

github.com/Deva-1903/ciir\_agentic\_search

Python, FastAPI, OpenAI / Groq, SQLite

- Built a **reviewer-facing UI** that lets users inspect extraction quality, ranking transparency, and cell-level provenance, an intuitive interface over an AI model and data workflow.
- Backed by a multi-stage **LLM agent** (typed retrieval planning, deterministic extraction, output verification) hardened with **150+ automated tests**; deployed as a live demo on Google Cloud Run.

### cf-ai-research-scout - Real-Time Streaming UI (TypeScript)

github.com/Deva-1903/cf\_ai\_research\_scout

TypeScript, Cloudflare Workers, WebSockets

- Built a **TypeScript** client that streams an AI agent's multi-step responses to the UI over **WebSocket** in real time, a real-time interactive interface with state persisted server-side.
- Designed the agent to fetch web sources and generate multi-step research digests, with durable workflows so tasks **recover gracefully** from process restarts and tool failures.

### Sonare - Cross-Platform React + Electron Desktop App

github.com/Deva-1903/Qualcomm-Sep25-Team-Sonare

React, Electron, FastAPI, MediaPipe, whisper.cpp | Qualcomm Edge AI Hackathon 2025

- Built a cross-platform **Electron + React** desktop frontend for an offline AI app, designing **async UI updates** to keep the interface responsive while processing live video and audio streams on device.

## Publication & Extracurriculars

- Publication:** "Alzheimer's Disease Classification using Transfer Learning," **IEEE CONIT 2023**, applied deep transfer learning on neuroimaging data for medical image classification.
- Selected for **GirlScript Summer of Code (GSSoC) 2023** and contributed to multiple open-source projects (Linkfree, Freehit, ProjectsHut).
- Tutored **30+** underprivileged students in programming at Sayur, non-profit in South Tamil Nadu.
