

Deva Anand

(413) 315-1715 | devaanand@umass.edu | devaanand.com | linkedin.com/in/devaaa | github.com/Deva-1903

Education

University of Massachusetts Amherst

Master of Science in Computer Science

September 2025 – May 2027 (Expected)

Amherst, MA

Coursework: Systems for Data Science, Performance Engineering, Optimization in CS, Advanced Machine Learning, Advanced NLP

Vels Institute of Science, Technology and Advanced Studies

Bachelor of Engineering in Computer Science and Engineering

August 2019 – May 2023

Chennai, India

Skills

Languages

Python, JavaScript, TypeScript, Java, C++, SQL, Bash

Backend & APIs

Node.js, Express, FastAPI, Fastify, REST APIs, async services, integration testing

Frontend & Web

React, Redux, HTML/CSS, Electron

AI & Agentic

LLM agents, retrieval, structured extraction with verification, provider routing/fallback, OpenAI / Groq / open-source LLMs (Llama), durable agent workflows, Claude Code / Copilot / Cursor

Cloud & DevOps

AWS, GCP, Azure, Docker, Git, GitHub Actions, CI/CD

Experience

Wysa

Backend Engineer

July 2023 – July 2025

Bengaluru, India

- Architected a **full-stack internal tool** (React, Node.js, MongoDB) used daily by the AI team to label data for production models, replacing spreadsheet workflows; cut manual work by **100+ hours/month** and improved throughput by **60%**.
- Engineered a **multi-tenant backend** (Node.js, MongoDB) for **8+ clients** processing **10,000+ monthly submissions**; owned reliability across releases and remediated **20+ VAPT findings**.
- Served as primary technical point of contact, working cross-functionally with product and clinical teams and running knowledge transfer for new engineers.

Cario Growth Services Pvt. Ltd.

Backend Developer Intern

November 2022 – May 2023

Chennai, India

- Designed **20+ RESTful APIs** in Node.js and Fastify over PostgreSQL, collaborating with frontend developers on API contracts, and integrated **LLM-powered** context-aware replies into the chat product.
- Took **extreme ownership** of a self-directed ML feature with no ML mentor on the team, shipping a production auto-commenting system using **open-source LLMs** (Llama, 4-bit quantization via llama.cpp), per-persona prompts, async queued generation with rate limits, and a content-safety filter.

Projects

AgenticSearch - Provenance-First Agentic Entity Discovery

github.com/Deva-1903/ciir_agentic_search

Python, FastAPI, Brave Search, OpenAI / Groq, SQLite

- Built a multi-stage **agentic pipeline** that plans typed retrieval, extracts entities with deterministic parsers before LLM fallback, verifies outputs, and returns cell-level provenance for every value.
- Hardened the service with **150+ automated tests**, provider routing and fallback across LLM backends, and pipeline instrumentation for debuggability.

Underdogs Fitness - Production Full-Stack Platform

underdogsfitness.in

React + Redux, Node.js, Express, MongoDB, Stripe | solo, live 3+ years

- Built and deployed a **production full-stack platform** (MERN) **solo end-to-end** for a real client, with Stripe and manual-cash payments backed by a partial-payment ledger and cron-based automation; **90%+** of payments moved through the portal and client manual workload dropped **70%**.
- Set up **git-webhook CI/CD** auto-deploy and a multi-branch architecture from day one; the client opened a second branch as a config change with **zero schema migration**, and the platform is still in production **3+ years** later.

cf-ai-research-scout - Edge-Native AI Agent

github.com/Deva-1903/cf_ai_research_scout

TypeScript, Cloudflare Workers AI, Durable Objects, WorkflowEntrypoint, D1, WebSockets

- Built an edge-native **AI research agent** with durable, **self-healing workflows** so multi-step tasks survive process restarts and tool failures, with state persisted server-side and no external database; streams responses to the client over WebSocket in real time.
- Used Workers AI for embeddings and streaming inference and prototyped end-to-end stateful agent behavior (AIChatAgent, Durable Objects, WorkflowEntrypoint, D1) without an external database.

Publication & Extracurriculars

- Publication:** “Alzheimer’s Disease Classification using Transfer Learning,” **IEEE CONIT 2023**, applied deep transfer learning on neuroimaging data for medical image classification.
- Selected for **GirlScript Summer of Code (GSSoC) 2023** and contributed to multiple open-source projects (Linkfree, Freehit, ProjectsHut).
- Tutored **30+** underprivileged students in programming at Sayur, non-profit in South Tamil Nadu.
