(413) 315-1715 | devaanand@umass.edu | devaanand.com | linkedin.com/in/devaaa | github.com/Deva-1903

Education

University of Massachusetts Amherst

Master of Science in Computer Science

September 2025 – May 2027 (Expected)

Amherst, MA

Coursework: Systems for Data Science, Performance Engineering, Optimization in CS, Advanced Machine Learning, Advanced NLP

Vels Institute of Science, Technology and Advanced Studies

Bachelor of Engineering in Computer Science and Engineering

August 2019 – May 2023

Chennai, India

Skills

Languages

Python, JavaScript, TypeScript, Java, C++, SQL, Bash

Backend & APIs

Node.js, Express, FastAPI, Fastify, REST APIs, async services, integration testing, authentication, rate limiting

Frontend & Web

React, Redux, HTML/CSS, Electron

Databases

MongoDB, PostgreSQL, Redis, SQLite, Firebase

Cloud & DevOps

AWS, GCP, Azure, Docker, Git, GitHub Actions, CI/CD

Experience

Wysa

Backend Engineer

July 2023 – July 2025

Bengaluru, India

- Architected a **full-stack internal product** (React, Node.js, MongoDB) used daily by the AI team to label data for production models, replacing spreadsheet workflows with secure role-based REST APIs; cut manual work by **100+ hours/month** and improved throughput by **60%**.
- Engineered a **multi-tenant backend** (Node.js, MongoDB) for **8+ clients** processing **10,000+ monthly submissions**; owned reliability across releases, monitored production logs, and remediated **20+ VAPT findings**.
- Served as primary technical point of contact, working cross-functionally with clinical and product teams on releases and integrations and running knowledge transfer for new engineers.

Cario Growth Services Pvt. Ltd.

Backend Developer Intern

November 2022 – May 2023

Chennai, India

- Designed and implemented **20+ RESTful APIs** in Node.js and Fastify over **PostgreSQL**, collaborating closely with frontend developers on API contracts used in production.
- Migrated the core codebase from **JavaScript to TypeScript** across multiple repositories, improving type safety and long-term maintainability.

Projects

Underdogs Fitness - Production Full-Stack Gym Management Platform

underdogsfitness.in

React + Redux, Node.js, Express, MongoDB, Stripe | solo, live 3+ years

- Built and deployed a **production full-stack platform** (MERN: React + Redux, Node.js, Express, MongoDB) **solo end-to-end** for a real client, with auth, membership and attendance management, **Stripe and manual-cash payments** backed by a partial-payment ledger, and cron-based renewal automation; **90%+** of payments moved through the portal and client manual workload dropped **70%**.
- Designed for **multi-branch** from day one (entities scoped by branch, JWT-claim auth, frontend branch context) with **git-webhook CI/CD** auto-deploy; when the client opened a second branch a year later, onboarded it as a config change with **zero schema migration**, and the platform is still in production **3+ years** later.

AgenticSearch - Provenance-First Entity Discovery Service

github.com/Deva-1903/ciir_agentic_search

Python, FastAPI, Brave Search, OpenAI / Groq, SQLite

- Built a **Python/FastAPI** service that turns open-ended queries into structured tables via typed retrieval planning, deterministic extraction with LLM fallback, and output verification, returning cell-level provenance for every value.
- Hardened the service with **150+ automated tests**, provider routing and fallback across LLM backends, and pipeline instrumentation for debuggability.

Sonare - Offline Sign ↔ Speech Cross-Platform Desktop App

github.com/Deva-1903/Qualcomm-Sep25-Team-Sonare

React, Electron, FastAPI, MediaPipe, whisper.cpp | Qualcomm Edge AI Hackathon 2025

- Built a **full-stack desktop application** (React, Electron, FastAPI) with an on-device pipeline (MediaPipe, whisper.cpp ASR, local TTS); designed async APIs and queues to keep the UI responsive, shipped end-to-end under hackathon time pressure.
- Engineered the FastAPI backend and Electron/React frontend to run fully offline with no external network dependencies, integrating camera and microphone capture with local on-device inference.

Publication & Extracurriculars

- Publication:** “Alzheimer’s Disease Classification using Transfer Learning,” **IEEE CONIT 2023**, applied deep transfer learning on neuroimaging data for medical image classification.
- Selected for **GirlScript Summer of Code (GSSoC) 2023** and contributed to multiple open-source projects (Linkfree, Freehit, ProjectsHut).
- Tutored **30+** underprivileged students in programming at Sayur, non-profit in South Tamil Nadu.
